What MMAP Replaces

Montessori Makers Alignment Map (MMAP)

MMAP replaces the "school operations patchwork" that quietly drains your time:

- **Spreadsheets for everything** (enrollment, tuition, rosters, staffing, lists on lists)

- **Sticky-note systems + hallway updates** for coverage and daily changes

- **Disconnected tools that don't talk to each other** (SIS + billing + forms + messaging)

- **Endless email threads** to find basic information

- **Google Drive chaos** ("final_FINAL_v3_reallyfinal.pdf")

- **Duplicate data entry** across multiple systems

- **Manual progress reports** + copy/paste narrative writing

- **Scattered observations** that never turn into a clear picture of growth

- **Admissions pipelines that live in someone's head**

- **Compliance and health forms managed by memory and panic**

- **Staff onboarding that relies on unwritten knowledge**

- **Leadership meetings with no dashboard** (just vibes + urgency)

What you get instead

One platform for aligned Montessori operations:
people · learning · admissions · finance · compliance · reporting
